Strange But True

by Lucie Winborne

• The word "sock" comes from the Latin word "soccus" – a loose-fitting slipper worn by Roman comic actors.
• Despite creating some of the most legendary guitars in the world, Leo Fender, the founder of Fender, Music Man and G&L Guitars, couldn't actually play the instrument.

• Alexandre Dumas used a particular shade of blue paper on which to write his fiction. For poetry, he used yellow paper, and his articles were penned on pink paper. Once, he ran out of blue paper and had to use a cream-colored pad instead, which he believed had a negative impact on that work of fiction. ©2025 King Features

Fun Fact

On the roof of the nasal cavity (the space behind your nose) is the "olfactory epithelium," which contains millions of receptors that sense odor molecules. Through the air, odor molecules drift into the nasal cavity and stimulate some of the receptors, which then stimulate the brain to recognize that odor from among the many thousands of different smells cataloged in the brain.

Even Exchange by Donna Pettman

Each numbered row contains two clues and two 6-letter answers. The two answers differ from each other by only one letter, which has already been inserted. For example, if you exchange the A from MASTER for an I, you get MISTER. Do not change the order of the letters. ©2025 King Features Synd., Inc.

God's Justice and Grace

The Lord is slow to anger but great in power; the Lord will not leave the guilty unpunished. Nahum 1:3. READ Nahum 1:1-8, 15

English Romantic painter John Martin (1789–1854) is known for his apocalyptic landscapes depicting the destruction of civilizations. In these fantastic scenes, humans are overwhelmed by the magnitude of the destruction and powerless against the approaching doom. One painting, *The Fall of Nineveh*, depicts people fleeing the coming destruction of mounting waves under dark rolling clouds.

More than two thousand years before Martin's painting, the prophet Nahum prophesied against Nineveh foretelling its judgment. The prophet used images of mountains quaking, hills melting, and the earth trembling (Nahum 1:5) to symbolize God's wrath on those who'd oppressed others for their own gain. However, God's response to sin is not without grace. While Nahum reminds his listeners of God's power, he notes that He is "slow to anger" (v. 3) and "cares for those who trust in him" (v. 7).

Descriptions of judgment are hard to read, but a world where evil isn't confronted would be a terrible one. Thankfully the prophet doesn't end on that note. He reminds us that God desires a good and just world: "Look, there on the mountains, the feet of one who brings good news, who proclaims peace!" (v. 15). That good news is Jesus, who suffered the consequences of sin so we can have peace with God (Romans 5:1, 6). By Matt Lucas

How do you want God to defend the oppressed? How might your understanding of His wrath against injustice prompt you to speak up for the oppressed?

Father, I pray for those around the world who suffer unjustly.

Strange But True

by Lucie Winborne

• Over the course of her 63-year reign, Britain's Queen Victoria survived no fewer than eight assassination attempts.
 • Like humans, male kangaroos flex their bi-iceps to impress females.
 • Studies have suggested that gifted people often have bad handwriting because their brains work faster than their hands.

©2025 King Features Synd., Inc.

DEAR PAW'S CORNER: I adopted a beautiful pup at about 3 months old this winter. Now that the weather is warming up and "Blondie" is about 6

months old, I can't wait to start going on hikes with her. How far can a puppy that age walk? Do you have any safety tips? – Carl J., via email

DEAR CARL: Blondie sounds like an amazing pup! With the correct training, she will eventually be able to accompany you on some hikes – but not this season.

Puppies at 6 months of age should only take limited walks, ranging from five to 10 minutes max, on level ground. Don't take them farther – pushing them too soon can cause a host of physical problems because their growth plates haven't fused.

Most experts recommend lengthening walks gradually starting from about 9 months. For longer distances over uneven ground, and when training dogs to carry their own panniers, wait until they are 12 to 18 months old.

So, you won't be able to take Blondie with you on day hikes this year – unless you carry her. There are special "sport sacks" just for carrying small- to medium-size dogs. Think of it as a fitness challenge for you, and a way for your pup to learn to love the outdoors.

In the meantime, you can work on Blondie's

obedience training. It's critical that she respond immediately when you call her, especially out on hikes. She should also be well socialized to people and other dogs – this prevents a lot of grief on the trail. Right now is the perfect time to do that, and to bond with your dog so that you have fun whether you're outdoors or not.

Kovels

Antiques and Collecting
by Terry and Kim Kovel
©2025 King Features Synd., Inc.

Q: Somehow, I ended up with a soup/salad plate marked as follows: "Theodore Haviland/France/Expressly made by Theodore Haviland/Limoges/France/for/Canadian National Railways." I don't suppose it's worth anything by itself. Just curious.

A: Theodore Haviland was one of the sons of David Haviland, who started the Haviland porcelain firm in Limoges, France, in the 1840s. Theodore opened his own company in 1893. The mark on your plate was used from about 1903 to the 1920s. Individual Haviland plates are usually worth about \$20 or less, unless they have an especially rare pattern. Railroad china, however, is usually worth more. A Theodore Haviland plate made for the Canadian National Railways sold at a recent auction for \$50. Railroad memorabilia can sell for high prices. Items like tableware and silverware, which were also sold at gift shops, are associated with dining cars and luxury travel, making them especially desirable. If you would like to learn more about railroad china, a railroadiana collector's club like the Railroadiana Collectors Association Inc. (railroadcollectors.org) will have resources. To learn more about your plate, the Canadian National Railways Historical Association (cnrha.ca) has more information on the history of the Canadian National Railways.

TIP: Hummel figurines should be cleaned by washing in liquid detergent and water, half and half. Never put them in the dishwasher.

Outdoor Opportunities

By COL (Ret.) Grey D. Berrier II

It's Bad Out There, Are You Prepared to Battle
Ticks Before They Bite You? (Part 1 of 2)

I guess I was overly optimistic. I kept telling myself, we just went through a "Real Winter" with some snow and colder temperature, and those conditions would help reduce our tick populations, here in PA. Well, my excursions in March and the first half of April have shown that ticks continue to thrive in our area and they want to climb on and bite you, your loved ones, and your pets. The harsh reality is Lyme Disease, a tick-borne illness, along with Babesiosis, Human Granulocytic Anaplasmosis, Ehrlichiosis, Deer Tick Virus, Spotted Fever Group Rickettsiosis, Powassan Virus Disease, and Heartland Virus are all potential threats we face from ticks when we head afield in PA. Many of these tick-borne illnesses have serious long-term consequences and some can potentially be life-threatening, so they are nothing to take lightly or simply ignore. This Spring ticks can be a threat when you are out hiking, trout fishing, turkey hunting, gathering morel mushrooms, or simply working in your yard or relaxing on your porch/patio. My wife found a tick on her arm after simply spending a few minutes weeding a flower bed by the house.

Like many things in life, when it comes to ticks, "an ounce of prevention is worth a pound of cure." I prefer to be proactive when it comes to keeping ticks off of me. My first line of defense is clothing and gear treated with Permethrin. Permethrin is a synthetic insecticide derived from the natural compound Pyrethrum, which is found in Chrysanthemum flowers. Allow me to be very clear, Permethrin is applied to your clothing and gear, it is NEVER applied directly to your skin. I hang up my outdoor pants, shirts, jackets, sweat-shirts, ghillie suit, sleeping bags, and tents on a clothesline under our pavilion, spray them with Permethrin, and then allow them to air dry outdoors for at least three days to permit the Permethrin's "chemical odor" to dissipate. I do this once a year, typically in the Spring, and Permethrin-treated clothing will maintain its tick repellency through a half-dozen washings. The most common brand I'm familiar with from outdoor-gear retailers is Sawyer. Sawyer Insect Repellent for Clothing, Gear, and Tents typically comes in a yellow spray bottle and a 24-ounce spray bottle retails for around \$18 to \$25. Sawyer is great stuff that definitely works, coming with a 0.5% concentration of Permethrin; but

it can get expensive when you have a lot of different clothing you wear when you hunt, fish, hike, or work outside.

Now, I'm going to share a tip I received from a gentleman about 10-years ago while were both waiting to have tires put on our vehicles. We

got into an outdoor-oriented conversation and somehow the subject turned to ticks. He said he also really liked Sawyer Insect Repellent for Clothing, Gear, and Tents; but he recommended another option after you use up the contents of your Sawyer spray bottle to save significant money. He told me to go to a farm supply store and purchase a 32-ounce bottle of Gordon's Permethrin 10 Livestock and Premise Insecticide Spray, which typically retails for around \$25. This agricultural spray comes at 10% Permethrin concentration, much higher than the 0.5% concentration of the Sawyer. What you do is reuse an empty Sawyer spray bottle or another clean spray bottle and carefully mix 1-ounce of the 10% Gordon's Permethrin with 19-ounces of water. This will result in 20-ounces of Permethrin spray at the desired 0.5% concentration to spray on your clothing and gear. That one 32-ounce bottle of Gordon's Permethrin 10 for around \$25 will enable you to mix up 32 batches, each 20-ounces, of the desired Permethrin solution, and will provide years of clothing and gear treatment for you and your loved ones. I recently saw one farm supply store had a smaller 10-ounce bottle of Gordon's Permethrin 10 for \$12, so that is an option, if you don't need to mix as much. FYI, Permethrin functions as a debilitating nerve-agent to ticks, mosquitos, and other insects; so those harmful vectors want nothing to do with it.

In addition to treating your clothing with Permethrin, there are other options you can apply to both your exposed skin and your clothing before heading outdoors. These include products formulated with various concentrations of DEET (from 15% to 100%); Picaridin; IR3535 (EBAAP); and an organic option: Oil of Lemon Eucalyptus (OLE). If I'm outdoors in either shorts or a short-sleeve shirt, I'll use a two-pronged approach to tick defense with Permethrin treated clothing and usually a DEET containing product on my skin. I'm just going to come out and say it. I hate ticks and the potential problems tick-borne illnesses can cause. I have seen the consequences friends, co-workers, associates, and loved ones have endured because of tick bites and I don't wish those complications on anyone. Next week, we'll discuss what to do if you find a tick on yourself or someone you love. Stay tick-free!

God Bless, Be Safe, and Great Outdoors!

Now Here's A Tip

by JoAnn Derson

• “After too many mornings of rushing to find uniform pieces before a game, we decided to get smart. Now, sports uniforms get hung up with all accessories in the coat closet right after washing. They’re ready as soon as it’s game night – no looking under beds or in the back of overstuffed teenager closets!” – P.P. in Texas

• Here is a fun twine keeper that you can make with your kids using two repurposed clay flowerpots with drain holes. Choose a size that can easily fit a ball of twine or thin rope. Set the ball inside and invert one pot on top of the other, threading the line through the drain hole of the top pot. Secure with tape or hot glue. Now the ball doesn't get tangled up.

CITY OF

NEW CASTLE

RECYCLING INFORMATION

Who must Recycle: All residents and businesses of New Castle are required by state and local laws to recycle at their curb. Property managers must provide recycling for housing, condo, or apartment complexes for situations where they arrange for trash disposal. Act 101 and New Castle provide penalties for recycling violations.

Contact: Aiken Refuse, 724-758-9400, for information about your account and questions about the program. Contact New Castle for bins (when available)—724-656-3568.

How are Materials Collected: At your curb. Materials can be mixed together.

When: Contact Aiken Refuse for your schedule.

Large/Bulky Item Pickup: Residents purchase special tags for bulky items through the City's contractor, Aiken Refuse. Tags are available for purchase from Aiken Refuse's website.

Leaf & Yard Waste (excluding grass): Leaf waste must be placed in a brown paper leaf bag and put out during your normal trash pickup. Contact the City or Aiken for the schedule.

Christmas Trees: Aiken Refuse will pick up Christmas Trees at no charge to their customer base between Jan 4 – Jan 14 on normal garbage days. The tree must be free of decorations and trees greater than 8' must be cut into 4 pieces.

For More Information:

<https://www.newcastlepa.org/live/garbage-waste/>
<https://www.aikenrefuse.com/new-castle-residents>

Aiken Refuse:

724-758-9400

<https://www.aikenrefuse.com/>

- | | |
|--------------------------|---------------------------------|
| • Aluminum | • Steel and Tin CANS |
| • Plastic BOTTLES & JUGS | • Corrugated Cardboard |
| • Magazines | • Newspapers, Including Inserts |
| • Mixed Office Paper | • Junk Mail |

Only bottles, jugs, cans, and clean paper are recyclable in the curbside program. Do not place materials in plastic bags and do not include any items not listed. Acceptable materials may periodically change so always follow the information provided from your hauler.

Aiken Refuse has the right to reject recycling bins that contain nonrecyclable materials.

Businesses must also recycle, but may pick the recycling hauler of their choice.

<https://lawrencecountypa.gov/departments/recycling-and-solid-waste>

www.mercercountypa.gov/recycling

This article is funded in part through a grant from the PA Department of Environmental Protection.

USEFUL INFORMATION

Recycling can be confusing because what is accepted as recyclable may be different between hauling companies and communities. Recycling programs are driven by markets and vary from region to region and state to state. Newer residents that move to our community are often surprised by the differences.

“Wishcycling” and Contamination

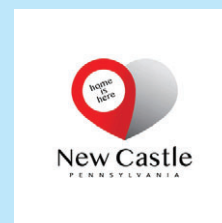

Contamination occurs when trash/unacceptable materials are placed in your recycling bin. With wishcycling people mean well, but unintentionally hurt recycling programs by placing the wrong materials into their bins. Examples include plastic toys, food containers, tubing, or buckets. When placed in the recycling bin, these and similar items must be physically removed and then landfilled. It is estimated that up to 20% of the cost of recycling is used to deal with items that should have been placed in the trash. Items that are not listed as recyclable WILL NOT get recycled. This includes plastic bags.

Plastic is the most confusing material because it comes in a variety of forms and resins that are chemically different. People often think that because something is “plastic” that it is recyclable. This is not the case. The same holds true with the “recycling” symbol and number commonly found on plastic items. The purpose of the symbol and number is to indicate the resin type. It has nothing to do with recycling!

Instead, focus on the shape of item. When it comes to recycling, think “plastic bottles/jugs, metal cans, and clean paper.” If you're holding a plastic item, consider if it is a bottle. For example, butter tubs, yogurt containers, and clam-shell/take-out food containers are plastic and usually have a recycling symbol and number on them. But—they are not a bottle/jug and belong in the trash. When in doubt, throw it out.

How to Prepare Your Recyclables

A simple rinse of food/beverage bottles and jugs is all that is needed. Cardboard should be flattened and mixed papers (magazines, junk mail, newspapers) can be placed in your bin loosely or in a brown paper bag. Do not put any materials in plastic bags. Plastic bags must be ripped open. And loose bags jam conveyor belts and gears. They are a significant cost to manage when they get into the system and will not get recycled at the recycling center. Many local grocers accept plastic bags for recycling.
